***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a test system with an indicator compound.

Group II, claim(s) 4-9, drawn to a method for determining the presence of an antibiotic.

Group III, claim(s) 10-13, drawn to a kit for determining the presence of an antibiotic.

Group IV, claim(s) 14-15, drawn to use of a compound for determining the presence of an antibiotic.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The Groups are directed to an indicator compound, a method, a kit and a use of an indicator compound to detect any antibiotic.

Reinhartz (EP 0 418 113 A2) entitled "Microbiological Assay Kit and Method for Detecting Antibacterial Compounds" teaches on page 3 lines 13-38, bromothymol blue can be used as an indicator for determining the presence of antibiotics.

Art Unit: 1657

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Indicator compounds and antibiotics.

Applicant is required, in reply to this action, to elect a single species of a specific indicator compound and a specific antibiotic to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: none.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: It is not seen that the invention is enabled to detect all antibiotics with the plethora of indicator compounds claimed in claim 1.
